(1) For each of the periods indicated, non-GAAP core systems revenue is obtained by adding non-GAAP server products revenue and non-GAAP storage products revenue, non-GAAP products revenue is obtained by adding non-GAAP core systems revenue and non-GAAP legacy systems revenue, non-GAAP global services revenue is obtained by adding non-GAAP customer support revenue and non-GAAP professional services revenue and non-GAAP revenue is obtained by adding non-GAAP products revenue and non-GAAP global services revenue. This table includes a reconciliation of each listed component to the comparable GAAP figures.

(2) The non-GAAP adjustments for SOP 97-2 are indicative of the revenue results the company would have recorded without the effect of SOP 97-2, although these are unaudited adjustments. We believe that this presentation more closely matches the results that would have been recorded had SAB 104 been applied, in which case the revenue for the hardware components of the arrangement would have been recorded when those deliverables were completed, and the primary remaining deliverable is customer support. Generally, this presentation matches the timing of billings to customers for the hardware deliverables, and therefore allows more transparency to cashflows.
