

### SGI® DMF™ Tiered Data Management

SGI's DMF provides a large-scale, storage virtualization and data management platform specifically engineered to manage and protect the petabytes of structured and unstructured fixed content generated by highly scalable and extremely dynamic high-performance computing (HPC) and data analytics (HPDA) applications.

DMF is powerful policy-based all-in-one HSM platform providing tiered data access, data assurance and archive capabilities via automated data migration from expensive production disk to Spectra Logic's Verde nearline disk as well as Spectra's tape libraries for deep storage.

- Automatically optimizes where data is stored to reduce infrastructure costs and management overhead, minimizing silos and maximizing utilization
- Provides IT administrators the tools to proactively manage, secure and utilize data across Spectra Logic tape libraries
- Enhances business continuance through integrated backups, data replication, and multiple disaster recovery strategies
- Optimizes storage infrastructure and makes informed choices about expansion

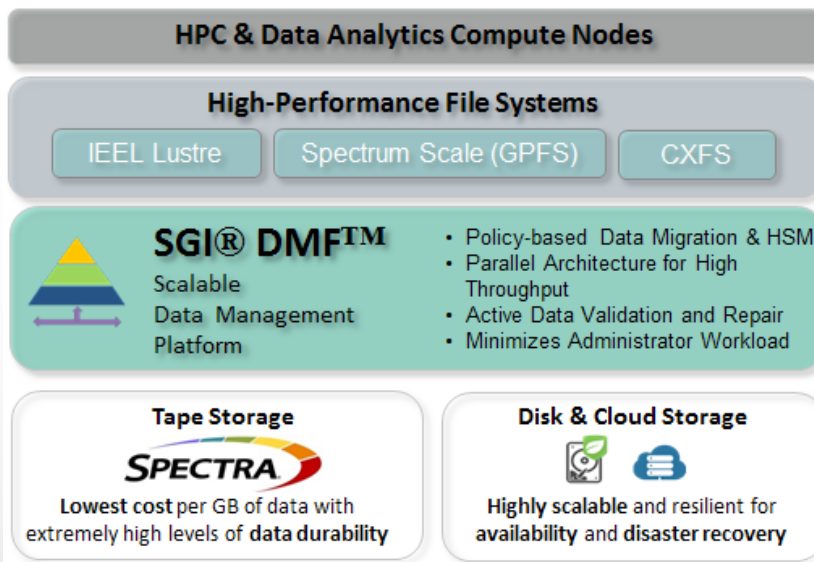

### Spectra Logic® Deep Storage Solutions

Spectra Logic develops deep storage solutions that solve the problem of digital preservation for business and technology professionals dealing with exponential data growth. As part of the SGI® DMF™ solution, Spectra Enterprise libraries seamlessly scale to the largest data storage system on the planet, provide the lowest total cost of ownership, and offer the reliability and service that keep our customers loyal.

Dedicated solely to storage innovation for nearly 40 years, Spectra Logic's uncompromising product and customer focus is proven by the largest information users in multiple vertical markets globally. Spectra enables affordable, multi-decade data storage and access by creating new methods of managing information in all forms of deep storage—including archive, backup, cold storage, cloud and private cloud.

#### Seamless Expansion Without Limitations

- Expand from 50 to over 400,000 LTO slots or 300,000 TS11X0 technology slots
- Scale to over an exabyte of data
- Occupy up to 71% less floor space than competing libraries
- Remote management through a secure, web interface

“ The incorporation of Spectra Logic’s active archive solution provides a platform for storage growth. It allows us to keep our primary data online and accessible to users, while also increasing the reliability of our stored data across physical sites. ”

Allan Williams, Associate Director (Services and Technologies), NCI
